

U15 + U16 TUESDAY - DECEPTIVE POSSESSION

90 minutes | U15: 16 players | U16: 18 players | 35x30 max | Teaching day

DECEPTIVE POSSESSION: ATTRACT -> MANIPULATE -> ESCAPE -> EXPLOIT

PINK	Team A	WHITE	Team B	YELLOW	1-touch neutral	RED	corner box/target
------	--------	-------	--------	--------	-----------------	-----	-------------------

0-15 | Deceptive Possession Activation

Two opposed grids

Purpose: Warm up through scanning, disguise, support and pressure recognition - no unopposed passing lines.

Set-up: Split into two grids. U15: 3v3+2 in each grid (all 16). U16: 3v3+3 in each grid (all 18).

How it works: Possession uses neutrals. Attract pressure, connect through another player, then pass/dribble through an open red gate. Turnover = immediate role change.

Scoring / progression: 0-5 unlimited. 5-10 neutrals 2-touch. 10-15 competitive: first side to 5 escapes.

Shared coaching: Do not escape before pressure commits. Scan before receiving. Use the third player rather than forcing through pressure.

15-32 | Four-Sided Escape

Two grids | familiar structure

Purpose: Manipulate one side, then recognize and use the free side.

Set-up: U15: two 3v3+2 grids. U16: two 3v3+3 grids. Neutrals provide outside/central escape options.

How it works: A point only counts when the ball moves from a pressured side through an inside connection to a different outside neutral.

Scoring / progression: 1 = escape; 2 = third-player escape; 3 = receiver can immediately face/play forward.

Shared coaching: Attract with purpose. Support at different heights and angles. Accelerate when the far side opens.

32-52 | 5v5+4 Four-Corner Escape

30x25 | 4x4 corner boxes | inside max 2 touches

Purpose: Move the ball away from defensive pressure by using one-touch corner bumpers as escape tools.

Set-up: 5 Pink v 5 White inside. Four Yellow neutrals stay in 4x4 corner boxes and are ONE TOUCH. Inside players are MAX 2 TOUCHES.

How it works: Possession may use any bumper. The bumper is not a safe rest station: its one-touch action must connect the next solution. When possession changes, the new team immediately owns all four bumpers.

Scoring / progression: 1 = 6 passes; 2 = use two different corner bumpers in one possession; 3 = attract pressure to one side and escape to the opposite-side corner.

Shared coaching: Two touches is a maximum, not a requirement. Ask: Where is the pressure? What space did it create? Can the next player see the far bumper before receiving?

COACHING LENS - ACTIVATION + FOUR-SIDED ESCAPE

U15 - 16 PLAYERS

Emphasize the players behind the first action. If possession is lost: P1 pressures, P2 removes the easiest escape, P3 protects inside. The 6 should already be thinking about the next transition.

U16 - 18 PLAYERS

Emphasize support relationships: one underneath, one beside, one beyond. PASS -> TRAVEL -> CREATE THE NEXT PASS. Do not let players admire a successful pass.

COACHING LENS - 5v5+4 FOUR-CORNER GAME

U15 - 16 PLAYERS

14 active, 2 rotate every 2-3 minutes. Rotate bumpers too - bumper is not a rest job. On loss, P2 removes the easiest bumper while P3 protects the central escape. If the bumper breaks the press: GET INSIDE.

U16 - 18 PLAYERS

14 active, 4 rotate every 2-3 minutes. Rotate all roles. Because bumpers are one touch, inside support must arrive BEFORE the pass. Look for one underneath, one inside, one anticipating the opposite escape.

U15 + U16 TUESDAY - PAGE 2

Same exercises for both teams. Change the coaching emphasis, not the activity.

52-72 | Directional Protect/Connect Game

Full 35x30

Purpose: Transfer deceptive possession into realistic direction while keeping the team organized underneath the attack.

Set-up: U15: 7v7+2. U16: 8v8+2. Yellow play with the team in possession. Attack opposite goals/targets.

How it works: Use possession to attract pressure before finding a switch, line break, wingback or forward connection.

Scoring / progression: 1 normal goal; 2 after a switch; 3 after a disguised/third-player line break.

Shared coaching: Do not make the wingbacks passive. Let the attack go; organize the players behind and around it.

72-88 | Free Game + 88-90 Review

Full 35x30 | minimal intervention

Purpose: See whether the principles survive when the restrictions disappear.

Set-up: U15: 8v8. U16: 9v9. Position teams as realistically as numbers allow.

How it works: Normal football. Coach on the run for 8 minutes, one short intervention, then 8 minutes without stopping.

Scoring / progression: Normal goals only. No touch limits, pass counts or bonus systems.

Shared coaching: Observe rather than solve: are we attracting or just circulating? Does support travel? Are we protected/connected when the attack accelerates?

COACHING LENS - DIRECTIONAL + FINAL GAME

U15 - 16 PLAYERS

Keep a 3+1 underneath the attack. Ask the 6: If we lose it now, where is their first forward pass? After regain: GO, CONNECT or SECURE.

U16 - 18 PLAYERS

As the ball travels, the team travels. On wide entries, create wingback + interior + forward connections. After loss: PRESSURE -> BLOCK -> PROTECT.
